

Light Rider

Installing the 'Power Link' Adapter

1. Connect the 'Power Link' cables to the motorcycle battery.

2. Attach the battery cable clip to the fuel tank. Use the clip to store the cable when not in use.

3. Attach the **'Power Link'** clip so that it will not pull away from your body.
 - Clip and cables should not interfere with your operation of the motorcycle.
4. Attach the **'Power Link'** connectors as shown below.
 - The connector going toward the motorcycle battery has a yellow band.
